39	2	2	1	1	2,4	3	1	1,4	2	1,2,3	1	1	1	Engaging (moderate)	Yes		2 Acquire immune disorder		1 Unprotected sex		1 Abstinance		1	1	1	1	1	Very effective	Videos	Openness
40	NA	2	3	1	1	2	1	1	2	2	1	2	2	It is tie	Yes		3 Has no cure		1 Sexual intercourse with infected person		1 Being faithful to your partner		1	1	1	1	1	Very effective	Videos	Improving awareness
41	4	2	2	1	1,2,3,4,5,6,7	4	1	1,2,3,4,5,6,	1	1,2,6		1	1	2 Good	Yes, most people nowadays get access to information throuah the socialmedia		1 HIV and AIDS is a transmitted disease		Sexual transmission, containment object i.e 1 sharo object i.harmel		1 Use of prescitive measure i.e condoms, 1 Abstainine for people under 18		1	1	1	1	1	Peer learning	Preventive measures, Those who have HIV & AIDs to be encouraged on drug adherance, avoidine stamatization	The government to support the campaign and seminar
42	7	1	3	1	1,2,3,4,5,6,7	3	1	1,2,3,4,5,6	2	2,4,5		1	1	2 Posting related content	Yes. Why i because most people prefer online		1 It is transmitted bv sex. blood containine		1 Sex intercourse. sharo contained object		1 Avoid sharine sharo object		1	1	1	1	1	NA	NA	NA
43	3	NA	1	1	1,2,3,4,5,6,7	3	1	1,2,3,4,5,6	2	1,2,4,51		1	1	1 Good	Yes. most people has access to social media		3 HIV and AIDs transmittable disease		1 Through sex. semen. sharine sharo object		1 Abstainable, Protective measure i.e condoms, Avoid containment objects		2	1	1	1	1	Good, most yought use social media to access 1 information	Prevention measure, Action to takeme tih, Encouraned the people linterwith HIV & AIDs	More compaign, seminar
44	3	1	1	1	2	3	1	6	4	1	2	2	2	Not very much advertised	Yes		1 A virus with no cure that is sexuals transmitted		Unprotected sex, cuts from sharps, mother to 1 child		Use condoms, screening blood before 1 transfusion		2	2	2	2	2	It is very effective as its the only way to raise 2 awareness amone youths	Effects	Make social media awareness more to influence the youths
45	1	1	1	1	1,5	2	1	1,4	2	2,3		2	2	2 Not quite engaging	Yes		3 Its a virus that mainly transmitted sexually		1 Through sex		1 Enseatine in protected sex		1	1	2	1	1	NA	NA	NA
46	4	2	2	1	4	2	1	4	3	5	1	2	2	NA	NA	NA	It is a virus transmitted through sex, blood contact with an infected person Its a human immune deficiency virus that is transmitted through a change of body fluids e.g blood, semen and breast milk from infected		1 Sex		1 Use of condoms		1	1	1	1	1	NA	About prevention of HIV/AIDS	NA
47	5	2	3	1	2,3,5	3	1	2,3	2	2	1	1	2	Highly engaging	Yes, at least a good number of youths are able to learn more about HIV		2 person		1 Through sexual intercourse		1 Abstains, use of condoms		1	1	1	1	1	It has helped in reducing stigma, They can prevent themselves by use of condoms, Preps 2 and PEPs	confessions	Educatine people on conventive measures
48	3	1	2	1	1,2,4,5	3	1	2,4	1	5	1	1	1	Highly engaging	Yes, it creates awareness and makes people to be cautious on HIV and AIDs		It is a virus transmitted though a change of 1 fluids with an infected person Its a human immunodeficiency virus transmitted through exchange of bodily fluids		Through exchange of body fluids with an 1 infected person		1 Use of preps, Use of condoms		1	1	2	1	1	Highly effective	Preventive measures	To be podcates through all social media platforms
49	5	2	3	1	1,4,5,6,7	3	1	4	2	2	1	1	1	It is highly engaging	Yes, I think so because people gets warned and are aware of what not to do		2 like breastmilk. blood		Sex with an infected person, Breat milk from 1 sick mothers		1 Use of condoms, One sexual partner		1	1	1	1	1	It is highly effective	How to prevent ourselves	It should be broadcasted in all social media platforms
50	7	1	3	1	1,2,3,4,5,6,7	4	1	1,2,3,4,5,6	4	2,3		1	1	1 Very engaging	Yes it is. It helps prevent the spread by creating awareness		It is a viral disease that affects the immunity of 2 an individual		1 Body fluids i.e blood, semen		1 Abstinance from unprotected sex		1	1	1	1	1	Very effective	Videos	Creating awareness on HIV/AIDs, preventing & monaement
51	5	2	2	1	5	2	1	4	4	4	1	2	2	Stigmatization of infected person	Yes, makes everybody aware of it		3 It is a virus that is spread to body fluids		Unprotected sexwith infected person, sharing 1 of needles with infected person		Not sharing sharp objects, Use of protection 1 durine sexual intercourse		1	1	1	1	1	NA	NA	NA
52	3	2	1	1	1,2,3,4,5	4	1	1,2,3,4,5	5	3,4,5		2	2	1 Very low	Yes. Abundance of crowd		1 HIV advances to AIDs		1 Sex		1 Condoms, Abstaining		1	1	1	1	1	Very much Due to its availability and 1 abundance the exchange of knowledge	Books, Courses	Mandatory schooling and publishing
53	4	2	1	1	2	1	1	1	4	4	1	1	2	Quite engaging	Yes. It is easily accessible		HIV/AIDs is a disease on a rise everyday and 3 most people are done due to lack of AIDs		1 Through blood transfusion. sexual intercourse		Avoid using contaminated sharp objects, 1 Abstainine from sex		1	1	2	1	1	Very effective	Testimonials	Having Educative programs on HIV/AIDs
54	7	2	3	1	3	2	1	1,4,6	4	1,2,5		1	2	2 Not engaging	Not really, not everyone can access social media especially for the illeterates		1 A viral disease		1 Sharing sharp ojects, Unprotected sex		1 Safe sex		1	1	1	1	2	The youths become oriented and exposed to ways in which it is sperad, prevention and 1 management and its siens and symotoms	Educative contents of ways of preventing HIV/AIDS. Educating people on ways of living with people with HIV/AIDS	HIV/AIDS campaigns, HIV/AIDS nursing education
55	3	2	2	1	1,2,4,5,6,7	4	1	4	4	2	1	1	2	It is not so much engaging	Yes , since a lot of people nowadays use social media and frequently thus will reach big awareness and most young people are very active		3 It leads to stigma thus low esteem		1 Body fluids of infected person mother to child		1 Condom, IPC		3	2	1	2	1	Very effective	Control and preventive measures	Educative videos
56	4	2	3	1	2,4,6	3	1	2,4	3	2,3,5		1	1	1 Very engaging	It is a good platform because it is a anonymous		A lot including its modes of transmission and 2 how to prevent oneself from aettine it		Unprotected sex, Sharing needles and 1 personal items		Having protected sex, Not sharing person 1 items and needle		1	2	1	1	1	Very effective	Its stages and signs and symptoms	Share more videos and pictures on what happens after aettine the HIV/AIDs
57	4	3	3	1	1,3,4,5,6,7	3	2	None	5	1,3		2	2	2 Barely, it is rarely published	No, social media is a platform used nowadays for fun		A transmittable virus in human through bodily 5 fluids		1 Sex, transfusion		1 Abstainance		1	2	2	2	2	Barely able to reach the youth	Memes	Advertisement
58	4	2	2	NA	2,4,7	1	1	2,6	3	1,5		2	2	1 Moderate	Not entirely		3 Its an acquired immune disease		Sexual intercourse, Unscreened blood 1 transfusion		1 Abstinance		3	2	2	2	2	Its moderate	Its signs and symptoms	More ads and testimonies
59	4	2	1	1	High-Content that is personal and relatable tends to do much better. Stories of people living with HIV, interactive questions and influencer led campaigns can facilitate 2,4,5,6,7 meaningfuleas enaagement	3	1	4	2	1	2	2	2		Yes, This is because most of the people use social media		It is a virus that weakens a person's immune system by target the CDA cells type of white 1 and blood cells that fahts inefction		Sharing sharp pobjects with infects persons, 1 sexual intercourse with an infected person		Abstaining from sex, Avoid sharing sharp 1 objects		1	2	1	1	1	Very effective in a case like Tiktok you get to learn the different ways that HIV/AIDs can be spread and the symptoms you need to check for incase you suspect that you have 2 contacted HIV/AIDS	Creative visual content. Youth-led campaiaies	Encourage the youth to watch HIV/AIDs related content on social media to create awareness amone themselves
60	4	1	3	1	2,4,5,7	4	1	2,4	3	1,4,5		1	1	1 It is quite engaging	Yes, this is due to a rampant number of people in the social media		HIV and AIDS is a disease caused by HIV virus leading to low immunity if not attended to early 1 and can cause death in severe scenarios		Exchange of body fluids i.e through kissing and blood transfusion, Practicing unprotected 1 coitus with individuals who are positive		Primarily, individuals should give their health priority and practice safe sex, know their status, abstain and wear protections when 1 handline body fluids from others		1	1	1	2	1	It's quite effective to youths who mostly come across testimonies and articles concerning 1 HIV and AIDs patients	I'd prefer more testimonies from HIV positive people concerning their journey in battling with the virus	I'd suggest online meetings concerning awareness about HIV and Aids and also various social media handles to increase their advert outreal concerning dangers and preventive measures against HIV/AIDS
